

THERMAL

WARMTH

COLD = DANGER

Many work-related accidents are caused by frostbitten hands and feet caused by the cold.

JLF Pro's choice : natural materials of proven quality.

In order to ensure maximum effectiveness of JLF Pro's line of thermal products, we recommend that you do not use them with cotton-based products.

For a good efficiency according to your profession :

- **static professions : VERY HOT**
- **professions requiring movement : HOT**

**TO USE IN
BOOTS AND
SAFETY SHOES**

NEW

WOOL KENAF INSOLE 0027

Naturally warm and breathable fabric
Anatomical for improved hold of the foot
Biodegradable and recyclable
Excellent protection against cold and humidity

Composition :

Top : 100% quilted wool in contact with the foot, features exceptional humidity regulation and transfer properties
Bottom : KENAF, renewable plant fibre, provides the sole with flexibility. KENAF stops the effects of cold coming from the ground while providing both lightness and comfort.

Double sizes : from 36/37 to 44/45

Standards :
NF EN 12746
NF EN 13520
